Title of game

General	Story	Online	Review	// close
---------	-------	--------	--------	----------

Label :

// text in the field

// edit textfield

Label :

// text in the field

// edit textfield

- If there is no data for field, show it but gray it out. have the edit Command usable so you add that entry if need be

- make so the text boxes can stretch to show mult lines of text.
or display it that way? maybe add a hide/show button for each field.
- tabs always at top, even if you scroll in the form.

↳ make each tab its own form?
